Objective

Detail-oriented PHP Laravel Backend Developer with 2+ years of experience in building scalable APIs and web applications. Proficient in Laravel, MySQL, PostgreSQL, and MongoDB, with additional skills in front-end development and WordPress. Seeking a challenging role to apply and grow full-stack expertise in a dynamic development environment.

Experience

- **NetMaxims Technologies** May 2025 - Present
Php Laravel Developer
 - Designing and developing scalable RESTful APIs using Laravel for client applications across eCommerce and real estate platforms.
 - Integrated multiple payment gateways including Stripe, PayPal and Revolut for secure online transactions.
 - Managed deployment workflows using Git, FileZilla, and PuTTY, and contributed to CI/CD pipeline setup using GitHub Actions.
 - Worked with MySQL, PostgreSQL, and MongoDB for relational and NoSQL data storage needs.
- **Datametrics Consulting Pvt. Ltd.** October 2023 - May 2025
Php Laravel Developer
 - Developed and maintained backend systems and REST APIs for internal tools like HRMS, CRM, and custom web platforms.
 - Participated in code versioning using Git & GitHub, managed basic deployment using FileZilla and PuTTY, and supported release activities.
 - Contributed to database design and optimization using MySQL and MongoDB.

Skills

- Php Laravel (RESTful APIs)
- Node.js & Express.js - Practical Learning Experience
- AI & Utility APIs: GPT-5, Gemini-2, Zepto Mail (integration & usage)
- Payment Gateways: PayPal, Stripe, Revolut
- Core PHP (OOP)
- MySQL, PostgreSQL and MongoDB
- React, HTML5, CSS3, JavaScript, Bootstrap and Blade Template(Laravel)
- cPanel, XAMPP, PhpMyAdmin, Deployment on shared hosting, VPS and cloud server
- Git, GitHub(version control)
- FileZilla, PuTTY (SSH and server access)
- CI/CD (setup and pipeline understanding)
- WordPress Theme & Plugin Customization

Projects

- **Travel CRM Platform**
 - Tech Stack: Laravel, PostgreSQL, REST API
 - Developed a custom CRM for travel agencies with lead tracking, quotation builder, and itinerary management.
- **HRMS (Human Resource Management System)**
 - Tech Stack: Laravel, MongoDB, Blade, RESTful APIs
 - Built modules for employee onboarding, attendance, payroll, and leave management.
 - Used Laravel Queues for handling large data operations like payroll processing.
 - Developed RESTful APIs for mobile app integration.
- **Real Estate Estimation Platform**
 - Tech Stack: Laravel, MySQL, RESTful APIs, Stripe Payment Gateway

- Built a custom property estimation system where users submit housing requirements (e.g., 2BHK + Dining), and admins generate proposals. Integrated Stripe for payments, used MySQL for flexible property data, and implemented admin panel, dynamic filters, and SEO-friendly URLs.
- **Gym Machine Repair Plateform**
 - Tech Stack: Laravel, MySQL, REST APIs, JWT Auth
 - Admin panel APIs for managing users, assigning service requests, and tracking work order history.
 - Customer APIs for raising repair requests, viewing status updates, and service history.
 - Engineer APIs for job acceptance, status updates, and customer communication.
 - Implemented JWT-based authentication, role-based access, and real-time status flow for mobile app integration.
- **Online Health Service Plateform**
 - Tech Stack: Laravel, MySQL, REST APIs, JWT Auth
 - Developed backend APIs for a healthcare platform enabling doctors to manage patients and services online.
 - Built APIs for doctor onboarding, profile management, appointment scheduling, and digital consultation handling.
 - Created admin-side APIs for managing doctors, verifying credentials, and monitoring platform activity.
 - Designed patient-side APIs for browsing doctors, booking appointments, and accessing health records.
 - Implemented role-based authentication using JWT and secure data handling for medical information.
- **Fitness Gym Service**
 - Developed a RESTful backend using **Laravel and MySQL** for a fitness gym service.
 - Providing **custome & recommended workout programs, nutrition planning, InBody tracking, and steps monitoring.**
 - Implemented modular APIs for user management, fitness data handling, and program customization.
- **Frontend – Sustainable Environment Services**
 - Designed and built a static sustainability-focused website using React, HTML, CSS, and Bootstrap to promote environmental awareness with a responsive and user-friendly interface.

Education

Course / Degree	School / University	Grade / Score	Year
B.Tech(CSE)	JP Institute Of Engineering and Technology, Meerut, (UP)	76%	2019-23
Intermediate	AN College Patna, Bihar	75%	2017-19
10th Standard	H S Baisa, Khagaria, Bihar	70%	2016-17
